FITARA creates opportunities for Federal CIO to make positive changes

Three ways to get started on implementing the FITARA requirements

The Federal Information Technology Acquisition Reform Act

(FITARA) requires the heads of Federal agencies to ensure that their respective chief information officers (CIOs) have a significant role in information technology (IT) decisions, including annual and multi-year planning, programming, budgeting, execution, reporting, management, governance, and oversight functions. In spite of many uncertainties as to what to expect from the new law, federal leaders can begin with these three steps - 1) Establish agency-level "FITARA board" to include the agency senior leadership 2) Define scope of IT 3) Evaluate current governance processes for IT budget, acquisition, and program management. **Read more...**

Achieving Results

Capability Highlight: Application Rationalization

Are you looking for a way to reduce your IT costs while modernizing the IT application portfolio at the same time?

Application Rationalization

is an analytical approach to decision-making about maintaining, upgrading, modernizing, and retiring applications. Organizations can use it to free-up IT resources from unused, redundant, and "high maintenance" legacy applications. This enables the re-allocation of resource to create an effective roadmap for each application and modernization project pipeline. NISH Consulting can help you rationalize and modernize your application portfolio. [Read more....](#)
